## **CUTTING INSTRUCTIONS FOR GRATE TOPS**

For ease of cutting Lauxes drains, we recommend using a compound miter saw fitted with a multi-material cutting blade 80 tooth or more. We also recommend using a Lauxes TCT hole saw to drill the hole for the waste outlet.

- 1. Cut the bottom tray 3mm shorter than desired length to allow end caps to be fitted.
- 2. Cut the top drain 1mm shorter than the bottom tray to allow for easy roll-in of top drain and tidy fit.

- 3. Using a suitable size Lauxes hole saw for your pop waste, drill out the hole at the required position to align with the waste pipe in the floor.
- 4. Insert the end caps into bottom tray and secure with a bead of silicone on the outside of tray.
- 5. Place silicone around the lip of the pop waste and secure to the underside of bottom tray at the recently drilled hole.
- \* During installation use a template to ensure the drain does not come in contact with any wet cement based products.

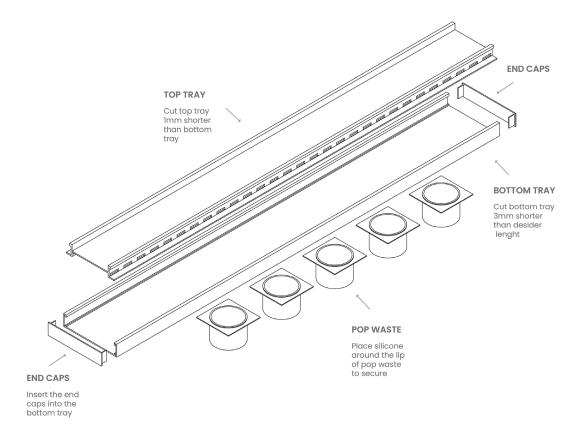

Installation to be by a licensed plumber and in accordance with AS/NZS 3500.2.

## **CUTTING INSTRUCTIONS FOR TILE INSERT TOPS**

For ease of cutting Lauxes drains, we recommend using a compound miter saw fitted with a multi-material cutting blade 80 tooth or more. We also recommend using a Lauxes TCT hole saw to drill the hole for the waste outlet.

- 1. Cut the bottom tray 3mm shorter than desired length to allow end caps to be fitted.
- 2. Cut the top drain 1mm shorter than the bottom tray to allow for easy roll-in of top drain and tidy fit.

- 3. Using a suitable size Lauxes hole saw for your pop waste, drill out the hole at the required position to align with the waste pipe in the floor.
- 4. Insert the end caps into bottom tray and secure with a bead of silicone on the outside of tray.
- 5. Place silicone around the lip of the pop waste and secure to the underside of bottom tray at the recently drilled hole
- 6. When gluing tile, use a neutral cure silicone.
- \* During installation use a template to ensure the drain does not come in contact with any wet cement based products.
- \* When glueing tile, use a neutral cure silicone.

Installation to be by a licensed plumber and in accordance with AS/NZS 3500.2.

## **CUTTING INSTRUCTIONS FOR STORM WATER TOPS**

For ease of cutting Lauxes drains, we recommend using a compound miter saw fitted with a multi-material cutting blade 80 tooth or more.

- 1. Cut your Lauxes drain to the desired length.
- 2. Remove existing plastic top tray.
- 3. Replace with new Lauxes Storm Water top tray.
- 4. When installing the tile insert top, use a neutral cure silicone to glue tiles.
- \* During installation ensure the drain does not come in contact with any wet cement based products.
